Summary

Highly accomplished and results-oriented Level 4 Software Engineer with 7+ years of experience in designing, developing, and deploying scalable and robust software solutions. Proven expertise in full-stack development, cloud platforms, and agile methodologies. Adept at leading complex projects, mentoring junior engineers, and driving technical innovation to meet business objectives.

Skills

- Programming Languages: Python, Java, Go, JavaScript, TypeScript, C++
- Frameworks & Libraries: Spring Boot, Node.js (Express), React, Angular, Django, Flask
- Cloud Platforms: AWS (EC2, S3, Lambda, RDS, DynamoDB, SQS, SNS), Azure, Google Cloud Platform
- Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra
- DevOps & Tools: Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform, Ansible, Git
- Methodologies: Agile (Scrum, Kanban), Test-Driven Development (TDD), Microservices Architecture, RESTful APIs
- Other: System Design, Distributed Systems, Data Structures & Algorithms, Performance Optimization, Security Best Practices

Experience

Senior Software Engineer (Level 4) | Acme Corp | San Francisco, CA

Jan 2021 – Present

- Led the design and implementation of a new microservices-based payment processing system, reducing transaction latency by 25% and increasing throughput by 40%.
- Mentored a team of 3 junior engineers, providing technical guidance and code reviews, resulting in a 15% improvement in team code quality metrics.

- Architected and deployed a highly available data ingestion pipeline using AWS Lambda and Kinesis, processing over 1TB of data daily with 99.9% uptime.
- Optimized critical database queries and caching strategies, leading to a 30% reduction in database load and improved application responsiveness.
- Collaborated cross-functionally with product managers and QA to define requirements, deliver features on time, and ensure high-quality releases.

Software Engineer | BetaTech Solutions | San Jose, CA

Jun 2017 – Dec 2020

- Developed and maintained core backend services using Java and Spring Boot, supporting a user base of 500,000+.
- Contributed to the frontend development of a customer-facing dashboard using React, improving user engagement by 10%.
- Implemented automated testing frameworks (unit, integration, end-to-end) that reduced regression bugs by 20%.
- Participated in on-call rotations, troubleshooting and resolving production issues efficiently.

Projects

Real-Time Chat Application

Developed a real-time chat application using WebSockets, handling 1000+ concurrent users. Technologies: Node.js, React, Redis.

Education

B.S. in Computer Science | Stanford University | Stanford, CA | 2017

Certifications

AWS Certified Solutions Architect – Associate
